EUC Vault Git Cheat Sheet

1. Check Status

git status

2. Stage Files

git add .

git add filename.py

3. Commit (local save)

git commit -m "message"

4. Push to GitHub

git push

git push -u origin main

5. Pull (download updates)

git pull

6. Branching

Create: git checkout -b feature-name

Switch: git checkout main

List: git branch

7. Merge a Branch

git checkout main

git merge feature-name

git push

8. Delete a Branch

git branch -d feature-name

9. Fix Common Mistakes

Unstage: git reset

Undo last commit (keep changes): git reset --soft HEAD~1

Undo last commit (discard changes): git reset --hard HEAD~1

10. Python .gitignore

__pycache__/

*.pyc

.env

.vscode/

11. Daily Workflow

git status

git add .

git commit -m "message"

git push
